

Adventures in Anywhen Morphamish + Tryptamines

Adventures in Anywhen is a collaboration between Tryptamines, classical electro blues psychonauts, and Morphamish, electronic composer and musical wanderer. These seven collaborative remixes are part of a journey which has taken them around this planet, including a win at the Independent Music Awards in New York. Now, Adventures in Anywhen guides travellers on a journey to Planet Anywhen, a musical planet with diverse unusual inhabitants imagined by Morphamish.

This **adventurous interdimensional virtuosic band** of explorers set out across **multiple zones** of Anywhen, armed with many **instruments** and **analogue machines**. They learned the ways of this strange planet's inhabitants easily, having a compatible culture. **Mixes** with the locals brought about the **Tryptamines** having their own **songs**, myths and sacred texts reinterpreted in Anywhen's universal language, **Morphamish**.

A word from Morphamish

An album of select few words about universal love, the inherent worth of every sentient being,
the transient nature/ insignificance and significance of life, the desire to escape the everyday
world, love and longing, putting up with shit, sanity and vitality struggles, following your dreams,
escaping the mundane, the universe of ideas manifesting in the physical world, humans making
gods in their own image making humans in their own image, grief, the mundane, memories, the
approaching singularity, algorithmic behaviour directing, ripple effects, controlled substances,
controlled consciousness, respite from it all.
